

# Children with High Acuity Needs Project - Indiana Council Update

S. Maria E. Finnell, MD, MS Chief Medical Officer, FSSA July 27, 2023

# Introduction to Children with High Acuity Needs Project

- The Children with High Acuity Needs Project is a Governor's Office-sponsored, interagency collaborative effort to provide appropriate and timely services to all Hoosier children, including children with high acuity needs.
- Involved agencies include:
  - DCS
  - o DOC
  - DOE
  - FSSA (DDRS, DMHA, OMPP)
- Agency Leadership:
  - Sarah Sailors, Chief Deputy Director and Senior Advisor, DCS
  - David Reed, Deputy Director Child Welfare Services, DCS
  - o Dr. Maria Finnell, Chief Medical Officer, FSSA
  - Cora Steinmetz, Senior Operations Director for FSSA and DCS, Governor's Office
  - Hamilton Smith, Operations Director for FSSA and DCS, Governor's Office

# Children with High Acuity Needs Project: Problem Statement

<u>Project Background:</u> Indiana and other states nationwide are working to serve children experiencing high acuity needs, especially with regards to identifying suitable and swift location responsive to their specific needs. This issue has been exacerbated by the pandemic; leading to increase in use of emergency departments for mental health crises, DCS-involved children staying in ill-suited settings, and the need for more intensive community-based services.

#### National Child and Adolescent Mental Health Statistics

- 20+ states are struggling to find appropriate placements for youth with the most intensive behavioral health needs
- In 2021, 24% of children nationwide entered child services custody primarily because of mental illness, developmental/intellectual disability, or as a diversion from juvenile corrections
- Youth in the US are being sent to emergency departments for mental health conditions at increasing rates

# Definition of Children with High Acuity Needs

Children with High Acuity Needs *require a higher level of care and supervision due to safety concerns* for themselves and others in the community. Due to these safety concerns, and the requirement for intensive services, *past interventions and other service offerings have typically not been sufficient* to meet the child's unique challenges. Children with High Acuity Needs require the identification of timely and highly specialized locations for treatment and services.

While each child's needs and experiences differ, many Children with High Acuity Needs often present with one or more of the following behaviors: violence (incl. towards peers, adults, and family), aggression, elopement, defiant behavior, maladaptive sexual behavior, self-harm, property destruction, and substance use disorder. Children with High Acuity Needs also frequently have multiple diagnoses (incl. mood disorders), a history of placement disruptions, intellectual and/or developmental disabilities, as well as behavioral and/or mental health concerns.

Children with High Acuity Needs, due to the circumstances listed above as well as past trauma and other compounding social and community factors, often require additional care, supervision, structure, and resources.

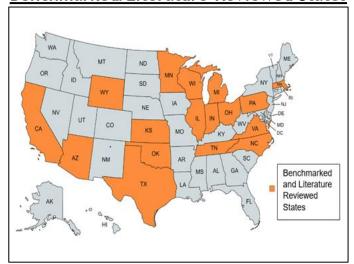

## Benchmark and Literature Review Summary

#### Program Best Practices Identified in Benchmark Research

- Utilization of a rapid response team
- Collaboration across agencies
- Diversion from psychiatric hospitals or state hospitals
- 24/7 access to services and/or crisis intervention
- Assessments to inform care and services

#### Benchmarked/Literature Reviewed States

#### Best Practices and Recommendations Identified in Literature Review

- Identify, track, and support children through their treatment process
- Set ambitious goals have every child placed in appropriate treatment quickly to avoid crisis
- Increase sustainable funding for programs to ensure that staff are compensated fairly to serve children
- Increase early identification and intervention efforts for families that are known to child welfare agencies
- Help emergency rooms and hospitals discharge patients by ensuring available step-down treatment options

### **Project Structure**

#### Interagency Collaboration and Cooperation

#### Rapid Response Team

**Treatment Options and** Suitability

Goal: Systems changes to provide appropriate and timely services to all children

**Support Services** 

Goal: Identify suitable location for treatment and services aligned with the needs of each child

- Find timely & appropriate location for treatment & service options in real-time
- Prioritization of teaming when children are in crisis situations
- Small, nimble group of inter-agency decisionmakers and specialized staff

- Elimination of barriers to treatment
- Alignment with child-specific needs
- Expansion of treatment & service options
- Reduction of time to placement
- Process flow for stepping up/down
- Crisis stabilization and long-term services

- Multidisciplinary teaming
- Specific programs for ID or DD, mental and behavioral health, or a combination of the above
- Community-based services (preservation, kinship, reunification, crisis intervention)

#### **Policy and Procedure Considerations**

**Workforce Considerations** 

Contracting & Funding Impacts

Data Collection & Analysis

## Workgroup Process

Brainstorming sessions led to the development of agency identified improvement opportunities

Share Knowledge

Brainstorm Improvement Opportunities

<u>Document</u> Action Items, Stakeholders

Identified

opportunity

Work with state leadership to prioritize and select opportunities to implement through a collaborative process

# **Project Timeline**

Currently planning for implementation of improvement opportunities which will continue past July 2023 Note: (

# Examples of Identified Improvement Opportunities

#### Inpatient & Residential Treatment

The Treatment Options & Suitability workgroup identified improvement opportunities:

- Continuum of Care
   (step up, step down)
- Acute/Crisis Capacity
- Residential Treatment
- Workforce
- Contracting and Payment

#### **Community-Based Support Services**

The Support Services workgroup identified improvement opportunities:

- Evidence-Based Practices
- Support Service Access
- Workforce
- Funding and Contracting

## Organization of Improvement Opportunities

- Statewide Alignment and Coordination of Systems and Care
  - Map and inventory available services throughout the State
  - Implement multi-agency, systems of care approach
  - Develop clear landscape of State funding
- Expand and Ensure Access to Sub-Acute and Intensive Support Services
  - Examples: pediatric partial hospitalization, mobile crisis stabilization, respite care support, wrap services
- Expand and Ensure Access to Appropriate Acute and/or Residential Treatment
  - Review admission and discharge procedures
  - Review training and contracting

# **Next Steps**

To build upon the work completed so far, the State has entered a secondary planning phase.

#### Secondary Planning Phase to Prepare for Implementation

Strategizing stakeholder engagement

Mapping current process and developing inventory of existing resources

Examining funding opportunities, including ways to braid funds

Consider implementation of key improvement opportunities

Continue Rapid Response Team convenings for cases in need of emergency support
